

National Romanian Consultation Report on short

Scope:	to validate the intellectual outputs produced, more precisely the Framework in the Knowledge Triangle in Logistics and the Guidelines for Assessing and Assuring Quality
Objectives:	<ul style="list-style-type: none">- assessing the need for developing education in Logistics- determining project stakeholders' opinions on FRAMELOG
Location:	Transilvania University of Brasov, ROMANIA
Date:	February 1 st , 2019
No. of participants:	37 stakeholders (academic staff, students, business and research institutions representatives)
Highlights:	<ul style="list-style-type: none">- there is a difference of perception between the representatives of business and those of HEIs- public institutions are the least prepared for planning the Knowledge Triangle- research institutions and businesses consider the performing phase shall be more specifically addressed within the European framework for Knowledge Triangle in Logistics- HEIs present their willingness to adapt, more specifically they are open to do the changes needed so as the Knowledge Triangle be successfully implemented- the business environment shows it is the least open to change the present condition in education
Sustainability:	Analysis of representative national programmes in Logistics and help them create and implement the Knowledge Triangle so as to write down a compendium of Romanian good practice
